

# AI BUSINESS

## FINLAND: THE HOME OF FUTURE DIGITAL SERVICES

[www.businessfinland.fi/AI](http://www.businessfinland.fi/AI)

AI Business program will increase Finland's international B2B digital service business. It improves capabilities of Finnish companies to utilize data and AI and to develop new business models and APIs. This enables new value creation and fast implementation of automated, data driven services.

Besides innovation funding for Finnish companies, universities and research institutes AI Business program

- provides opportunities for peer-to-peer learning and networking with cross-industry partners (AI Breakfasts, Co-innovations)
- encourages public-private partnerships on digital platforms
- provides free CSC computing resources for startups and SMEs for significant research projects funded by BF
- introduces international partners for market access and innovations in France, German, Japan and with Indian ICT giants.

Total funding of 200 M€ for 2018-2021.
