# Fabless Model of VLSI Solution

Teppo Karema

28 August 2025

# VLSI Solution

- Office 1000m<sup>2</sup> at Hermia, Tampere
- Clean room 250m<sup>2</sup>
- SMT protoline & warehouse 300m<sup>2</sup>

# What we are

- Fabless except testing
- Product company (VS...)
  - Audio, IoT, and Industrial markets
  - Sales through distributors
- Service company
  - Design and production services
  - IP licensing
  - Direct sales
- Totally about 80M ICs manufactured
- Core competence is IC design

# Latest achievement: VSRVES01

Tamperelainen VLSI Solution yhdisti Linuxin ja RISC-V:n audioprosessorissa

*Julkaistu: 30.05.2025*

## Features of VSRVES01

- All IP designed by VLSI
- Combo of two our processors:
  - 32-bit RISC-V Linux core (VSRV1)
  - 16/32-bit DSP core (VSDSP6)
- LPDDR2 Memory interface
- Ethernet, USB, etc peripherals
- Analog line-in and line-out
- DEMO PCB: Audio streaming over ethernet, web server, telnet, etc.

Co-funded by  
the European Union

# Highlights of VLSI's Foundry Model

## Fab-lite manufacturing

- Allows “full” control of the manufacturing
- Has moderately low capital requirement
- Needs only a few people
- Easy to scale up

## In-house testing

- DFT becomes included in the design flow
- Reduces Lead times and inventories
- Fast handling of quality issues
